

<b>Τίτλος Προτεινόμενης Διπλωματικής Εργασίας</b>
Mobile Forensic Public Dataset
<b>Επιβλέπων</b> Γ. Καμπουράκης
<b>Αριθμός Φοιτητών Ένας</b>
<b>Στόχος Διπλωματικής Εργασίας</b> ....
<b>Συνοπτική Περιγραφή Διπλωματικής Εργασίας</b> a. Theoretical Part The state of the Mobile Forensics Digital Corpora (i.e., phone images, other dataset types) in the scientific community. Are there any available? Can an investigation be simulated? Which are the problems caused by the potential lack of data?  b. Practical Part Creation of a dataset by performing acquisition of a test mobile device with one or more forensic tools and combining the elements into a database and/or an ontology according to specific data classification. Presentation of the database in a web service or REST API. In the long term, this can become a data depository.
<b>Προαπαιτούμενες Γνώσεις</b> Basic SQL, xml, basic web development.
